

The Entry Tool With Authority

The Tactical Entry Tool was designed for use by law enforcement and fire/rescue personnel for accomplishing forcible entry into buildings, vehicles and other locked enclosures.

The working ends of the tool, made of spark resistant heat-treated stainless steel, perform a diversity of tasks including prying, pounding and puncturing. The tubular steel handle reduces the overall weight while enhancing leverage, control and balance during use.

The material used as well as the manufacturing process involved are the best available and are backed with a full life time guarantee.

PRY FOOT has high arch fulcrum point for increased lifting and prying force

UNIQUE HAMMER HEAD FEATURE for battering or use as flat wedge impact point (not visible in photo)

FLAT WEDGE for door breaching (both structure and vehicle), miscellaneous lifting and prying

POINTED TANG for digging, pulling, puncturing, lock hasp removal, lifting, security screen removal

Texturized coated grip with adjustable hand guards
